

## Alley Cat's Cancer Recipe

*This was fed to her because she could not keep any canned or dry food down*

### INGREDIENTS:

- 2 cups water
- 1 cup oatmeal (quick)
- 2 eggs, raw
- 4 tablespoons lard
- 1 drop of vitamin E
- 2 small spoons that come in the herb kelp powder
- 1 teaspoon bone meal power
- 1 drop vitamin A 10,000 IU
- 2-One LB ground turkey rolls thawed, raw
- ½ canned carrots, mashed (optional)

### INSTRUCTIONS:

- Oat meal cook as directions on box, just cook with water and oatmeal.
- Crack open raw eggs and add to cooked oatmeal, mix and cook little more until eggs are cooked.
- Add lard to hot oatmeal and eggs and mix, it will melt.
- Then add vitamins to mixture like this <https://youtu.be/V-YOkKyb3s8> and powers, mix real good.
- Mix in ground turkey 1 LB at a time mixing real good by hand.
- Add carrots if your cat likes them.
- Then put in small freezer containers, take out of freezer as needed.

As for how much to feed, I put a teaspoon or two in her dish then added Immune Support (L-Lysine supplement powder for cat on top. Only leave out for 15 minutes - ½ hour if they do not eat it, throw it out. Keep trying to feed them, sometimes we fed Alley 4 or more times a day, or at least tried to feed her. Sometimes she would eat [hot dog treats](#), broke up on top of food, other times I had to add some water to her food.

If you do not all ready know it, a pet with cancer do not always like to eat, so when they do, you have to stick with what is working.
