

Alley Cat's Cancer Recipe the last two months

Her cancer had progressed and she was in the terminal stage, and would not eat the other recipe any more.

INGREDIENTS:

1-One LB ground turkey roll cooked, and drained
1 egg, hard boiled

INSTRUCTIONS:

- Cook ground turkey, drain all liquid off. Put in paper towel and press to get as much liquid out of the cooked turkey.
- Hard boil the egg for 5 minutes
- Let all cool, put egg in food processor, shell too, and then add to cooked turkey.
- Keep refrigerated, if your cat don't eat all of this in 5-6 days, toss out and make half of the recipe, next time.

If your cat can't keep food down or will not eat, something is wrong. Take your cat to a veterinarian for a check up. Our cat was taken in for a check up, blood work, with her symptoms and age she was diagnosed with a cancer called Lymphoma. The veterinarian suspected Alley's was isolated to her gastrointestinal tract. If you want to read more about Alley go to:
